

Testimonial – A letter from Nissan

Eutility's Mission

Ensuring customers recover all potential overcharges, receive the lowest forward cost the market can bear and, over the period of our agreement, guarantee our customers pay the lowest price for electricity, natural gas and telecommunications. That is, complete elimination of the risk of overpayment.

About Eutility

Eutility is a wholly Australian owned company. Providing corporate energy and telecommunications cost management solutions to Australian and International companies since 1979, we are pleased to have assisted more than 50,000 organisations to reduce their bottom lines.

Eutility has 40 employees across Australia and, through our ability to consistently provide quality savings for our customers we have built an ongoing client base of 3000 businesses in Australia and internationally.

Dear Eutility,

It is with pleasure I write to you and tell you how impressed we were with the prompt and very informative service your company offered us when we engaged the services of Eutility.

Although we didn't change retailers you were able to help us secure a very competitive rate through our current retailer.

I would not hesitate in recommending Eutility to anyone else hoping to reduce their energy costs, as the service you provided was very well informed and also your market experience secures a rate perhaps the average Joe would miss out on.

We will definitely be dealing with you again when we need to review our electricity needs upon expiration of our current contract.

Thanks again for your prompt and efficient service, given the very small window of opportunity we gave you in securing the offer in the two weeks we had left of our expiring contract.

Yours sincerely,

Designed by www.marketingeye.com.au
