

control: telecommunications

SmartAnalysis™ | Invoice Validation

Telecommunication costs form a substantial portion of your company's expenses. **Controlling invoice verification and contract compliance is complex** - requiring expertise, time, resources and budget.

So, let **Eutility manage and optimise your telecom expenses**. We do the hard work whilst ensuring you retain control and visibility throughout the process - and **our payment is by way of performance**.

Since 1979 Eutility has provided a suite of energy and telecommunications cost management solutions to over 2,500 large-market corporate and industrial customers.

In association with Eutility Trading AFS License No: 480703

SmartAnalysis™ delivers the control you need to manage your telecom usage and costs.

We have replicated our leading SmartView™ energy cost management service to deliver our clients a comprehensive telecommunications management and help desk service. Eutility's telecom help desk and software solution is designed to optimize the efficiency and overall cost of your company's telecommunication infrastructure.

Line-by-line invoice verification and contract compliance.

Apart from our standard telecom tendering and procurement services, Eutility will undertake a line-by-line invoice verification and contract compliance process comparing your service and costs against your service contract. We typically discover an incredible variance in several keys areas, including but not limited to:

- Removal of redundant services or zero tolling
- Prompt or early payment discounts are not visible or applied correctly
- Data pooling across mobile services not being applied to all services
- Mobile phones not "pooled" properly
- International roaming charges are not being picked up and plans ultimately altered to allow for contract roaming
- Mobile plans have unlimited data but profiling indicates they should be on a data cap

Want to take the next step to finding telecom cost savings? Let us take control and make it easy for you.

Your next step to finding telecom cost savings is easy.

All we require is access to your last month's telecommunications account via a simple authority form that we send to you. In addition, we require a copy of your existing contract to verify that all charges comply with the terms and conditions specified.

We will then run your invoice(s) through our software and uncover any potential overcharges and deliver you an overcharge verification report.

Eutility will take control. We contact your service provider and ensure any credits due to your company are implemented promptly.

That's all we do. That's why we are so good at it!

We uncover credits on 45% of tier one carrier invoices and in many cases even retrospective credits!
